

Developer in Test - Problem

Scenario –

1. Load the page – www.premierinn.com
2. In the home page, click on manage booking
3. Load the booking details (Booking Reference, Surname (Last Name), Arrival Date)
4. In the booking information page, click on Cancel booking
5. Handle the pop-ups and click on Cancel booking
6. Capture the cancellation number and write it to a csv file.

Criteria –

- Maven project
- Use design pattern like Page Object Model
- Proper element locators & Assertions
- Use JAVA OOPS concepts – Reusability of code
- Able to search for the booking details provided in the Test Data
- Use Data Tables in the feature file for fetching the test data and related details which you think.

Technology –

- **Code** - Use cucumber with Selenium and Java
- **Build automation** – Maven
- **IDE** – IntelliJ
- **Version Control, Collaboration & code repository** – Git

Note: Use your git account and upload to a public repository.

Test Data –

Booking Reference	First Name	Last Name	Arrival Date
AFTR761191	Automation	Tester	10-Nov-21
AIWR151432	Fred	Mali	11-Nov-21
BKAR13809	Robot	Machine	12-Nov-21
